

ACADEMIC QUALIFICATIONS				
Qualification	Institute	Performance	Courses	Year
B.Sc. (H) Mathematics	Miranda House, University of Delhi	8.5 CGPA	Linear Algebra, Probability & Statistics, Calculus	2027
WORK EXPERIENCE & INTERNSHIPS				
Research Intern IIIT Allahabad Computer Vision and Biometrics Lab				2025 - Present
- Conducted AI research under Prof. Shiv Ram Dubey in the Computer Vision and Biometrics Lab, focusing on designing and studying an intelligent Sudoku solver using computer vision and AI techniques. Studying various machine learning and deep learning algorithms. - Worked on problem formulation, model understanding, and analysis of vision-based approaches for grid detection and solution inference				
Executive, Start-Up Division Entrepreneurship Cell Miranda House				2024 - Present
- Developed a business venture idea, Beezkin—Beeswax Napkins, presented to investors. - Delivered case study presentations in competitions and facilitated educational workshops and sessions. - Recognized as Best Action Research Institution (2024-25) in Delhi under Skill-to-Entrepreneurship Program by National EduTrust of India				
SaNDAI DataGen Scholar SaNDAI Cares 1/75 globally				Feb 2025 - Present
- Analyzing their digital presence, identifying opportunities for AI and data improvements, and engaging with executive leadership of North Central Family Medicine (a pharmaceutical company) funded by the Sickle Cell Disease Association of America (SCDAA). - Creating a cybersecurity curriculum under the cybersecurity team. Learning skills in data visualization w/ Tableau & Google Analytics. - Gen AI Tool Market Research: Curated 40+ unique generative AI tools, maintaining accurate documentation and updates. - Gaining experience with Python, R, SQL, cloud computing, cloud storage applications like Microsoft Azure and Amazon Web Services, and Gen AI tools like ChatGPT, Gamma, Murf.AI, etc.				
Student Researcher, University of California (UCSC) UCSC SIP				June 2023 - Aug. 2023
- Researched one FRB sightline, the FRB20211203A, known to intersect a nearby (i20 Mpc) galaxy group, and inferred the nearby galaxy group’s contribution to the FRB dispersion from public photometry and distances to galaxies. - Analyzed Gemini/GMOS spectra of galaxies and estimated the spectroscopic redshifts. - This research factors into the FLAM survey, furthering our understanding of ionized gas distribution on cosmological distance scales. - Invited to speak at Life and Space Conference 2023 (Polish Astrobiology Society) and Harvard Science Research Conference 2023.				
Financial Analyst The Indian Hemp Store MH Live Project				Sept. 2024 - Jan. 2025
Analyzed key financial documents, including balance sheets, income statements, cash flow statements, and budgets, and conducted audit reviews to assess financial health, compliance, and growth potential.				
PROJECTS				
GAIA App Python, PyTorch, PSutil, matplotlib Figma LINK				September 2024
- GAIA, a server manager, is a middleman app between server providers and our clients—small and medium businesses—which would allow for a better sharing of server resources and also help limit the energy usage of the servers. - It schedules them to turn on and off using an AI and divides server usage between different clients while ensuring privacy, cost minimization, and energy efficiency. Prepared user stories and wireframes; conducted market and user research.				
Aerofit Database Design and Business Data Management Project LINK				September 2025
- Designed and implemented a normalized SQL database for AeroFit to manage customer profiles, fitness data, product catalog, and purchase history, enabling efficient CRUD operations and analytical querying and supporting marketing and revenue insights. - Conducted end-to-end business data analysis and visualizations by performing descriptive analytics, customer segmentation, and contingency probability analysis to profile target audiences for each treadmill product & delivered actionable business recommendations				
BSc Mathematics Website HTML/CSS, JS LINK				February 2026
Created a website for study material supporting 100+ math majors with 140+ curated readings, PYQs, and supplementary resources.				
Parameter-Efficient Fine-Tuning of Transformer Model using LoRA LINK				
- Evaluated a pre-trained Transformer model on AG News dataset for text classification & established baseline performance. - Applied LoRA-based PEFT to reduce trainable parameters & improve model performance & achieved 92.2% accuracy. - Build Forward Scholar: Accenture LearnVantage x Girls Who Code Program - Generative AI Nanodegree program.				
Mentorship for Teen Artists of Color—Writing Cohort TeenTix and The Colorization Collective				
- Selected for a mentorship that connects BIPOC professional artists with teen artists of color. Published an article on ArkReview. - Mentored for 5 weeks by Lila Bonow in creative writing. Exhibited work at a month-long exhibition at A/NT Gallery, Washington, DC.				
VOLUNTEER				
- Volunteered for the National Service Scheme (NSS). Scribed for special-abled students in 12th grade in the 2022-23 session. - Volunteered in conducting and managing Sankhya - Mathematics Society’s Annual Fest—ORIGIN ‘25				
TECHNICAL SKILLS				
Languages: Python, SQL, C, R, JavaScript, Mathematica, LaTeX, KiCAD Tools & Frameworks: HTML/CSS, Tableau, Power BI, Git, VS Code, Figma, KiCAD Libraries: Pandas, NumPy, Seaborn, PyTorch, scikit-learn, Matplotlib, Astropy, Scipy, SimPy				
HONOURS				
1 Slide Data Storytelling Challenge: 2nd place National Winner (out of 166 participants) - Winner: DataVerse 5.0 - Data Analytics Case Study Competition, Business Conclave 2026 1st place in Case Study Competition—Ada Lovelace Day ‘24: Department of Computer Science, Miranda House. - UniHack 2024 by ProjectSet: 1st place global winner among 107 participants and 48 teams in the CSR track. - AI4GOOD INCUBATOR by Teens in AI and Sage: Global 2nd Place Winner; won a USD 300 cash prize. - Student Space Congress ‘23 by NewSpace Chicago: Global High School Winner; won a USD 500 cash prize. - IRIS National Fair Finalist 2024: Physics and Astronomy category award by the government of India. - Solving for Humanity Challenge: Proposal won 4th globally with 2800 votes in 132 countries; presented to UNDP.
